WHAT IS IT?

i-eval Discovery is an interactive feature that visually displays all *planned* and *completed* ILO evaluation reports and their related *lessons learned*, *good practices* and *recommendations*.

This intuitive application provides tailored information through various filters, such as by theme, year, region, country, evaluation type, timing and nature. Information is downloadable and easy to share through export features. It can be used to inform project design, implementation, and organizational learning.

Accessing evaluation information has never been easier.

ACCESS:

970 evaluation reports
315 planned evaluations
4,000 recommendations
1,400 lessons learned
450 good practices
